

## Meena Balgopal's Mystery Science Cubes

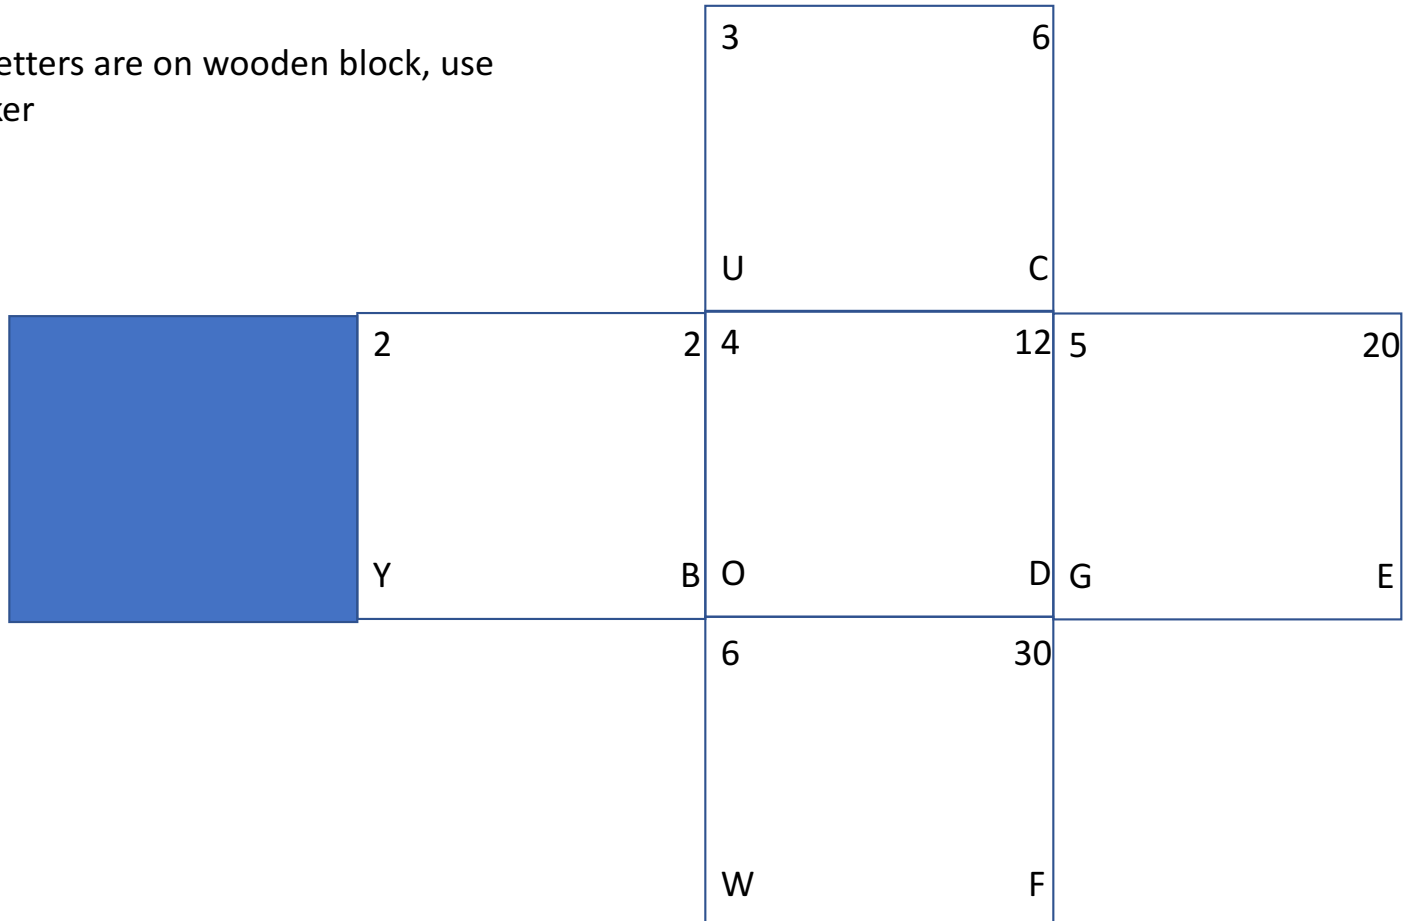

### Pattern for wooden cubes

It doesn't matter which sides have each set of numbers and letters. In fact, it's better if it differs with each block.

For the 6<sup>th</sup> side, I glue colored paper over the side of wooden block (or color in the side if it's a paper block, but, there is nothing written on this side.

If the block was printed on paper and then taped into a cube, this would be the shape.

If the numbers/letters are on wooden block, use permanent marker

If the block was printed on paper and then taped into a cube, this would be the shape.
